

## The Future of Secure Identity Management

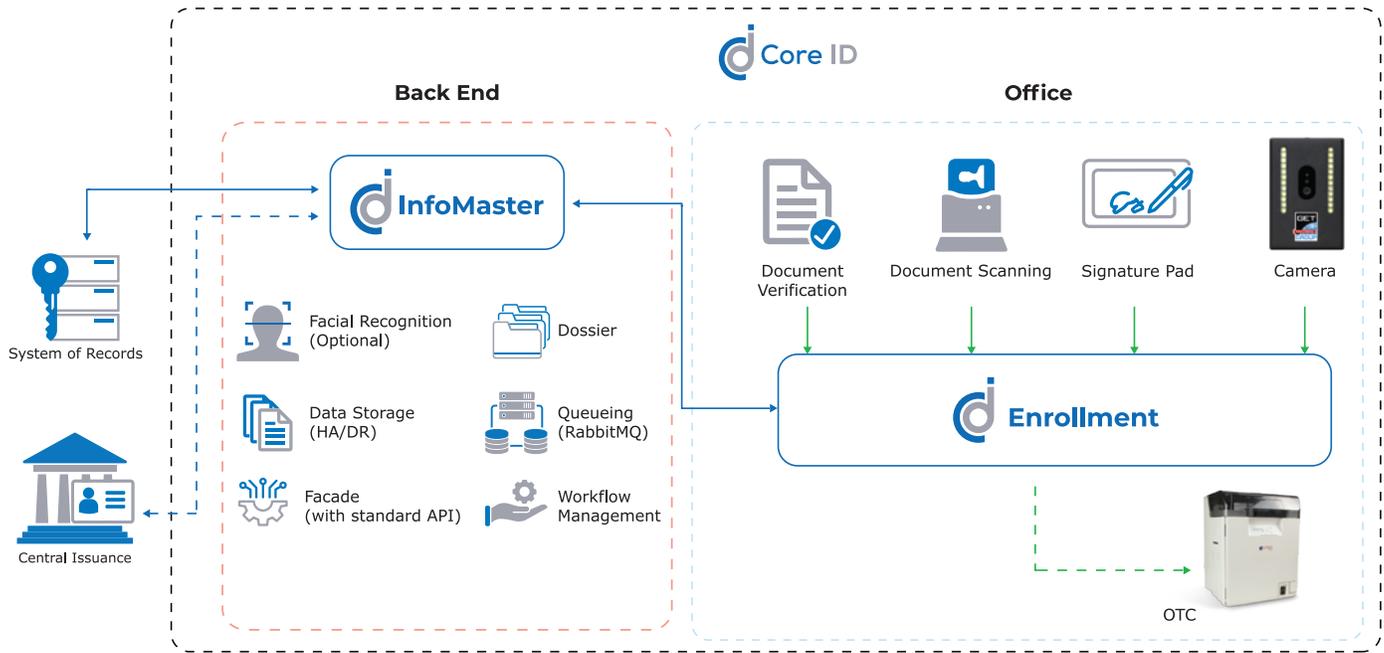

CoreID, an innovative platform that modernizes the ID issuance process with a secure, flexible, and modular approach.

Outdated legacy systems leave governments unable to efficiently take advantage of modern technologies. Older technologies expose jurisdictions to costly upgrades and vendor monopolies that do not solve inherent problems. CoreID addresses the following business requirements:

- Secure and persistent data protection for critical operations.
- High Availability for real-time processing
- Disaster Recovery
- Flexibility and modularity for a variety of business cases
- Support of rich media types, including images and videos
- Integration capability for modern and legacy infrastructures
- Extended lifecycle by preserving independence from proprietary and closed technologies

Whether you use an on-premise or cloud-based solution, CoreID quickly and easily integrates into legacy databases to help mitigate risk and fraud.

The Dossier, an intelligent data container, stores all information needed to issue any type of secure ID from data, images, documents and more. One Dossier – One Credential; contains all the biometric, biographical, and supporting documentation and issuance information of a credential

### CoreID Components:

- InfoMaster Server**  
Communication with web services and standard API
- Accounting and Reporting Systems**
- Workflow Management real-time**  
Customizable workflow to implement business logic
- Security Management**  
Active directory and Open ID
- Backup Protection**  
High Availability and disaster recovery
- User Management**  
User and role based management Management
- Print Manager**  
Over the counter and central issuance configuration
- Enrollment Workstation**  
High resolution camera, signature pad, credential validation, document and credential scanner.
- Web Enrollment**  
Image capture, signature capture, document upload

## About GET GROUP North America

GET Group North America is a flexible, reliable partner and we enable our customers to issue and verify the most secure physical and digital credentials. When you work with us, you feel like our only customer.

We have over 30 years of identity management, secure document personalization and mobile ID experience to deliver passports, driver's licenses, mobile IDs, and other high assurance identity documents.

We invest in the latest technologies to deliver modernized solutions to minimize our customers' risk and solve critical challenges. We innovate to combat fraud and produce privacy centric identity solutions people trust.
