

GET MOBILE VERIFY FOR WINDOWS®

Quickly Accept Contactless IDs from Around the Globe

The ability to scan and verify mobile Driver's licenses from the Windows operating system can operate standalone or is easily integrated into your current workflow.

- Verify Mobile IDs from your Windows devices
- Validate Mobile IDs from around the world
- Fits your customer workflow at point of service
- Cryptographically checks authenticity and validity

Mobile Driver's Licenses and IDs are here! Be prepared to quickly accept Mobile IDs from anywhere in the world as legal forms of age-verification or identity. Speed up your identity verification processes and make it easier and more secure than ever for customers to do business with you.

What is GET Mobile Verify?

GET Mobile Verify accepts mDLs and verifies that they are authentic and unaltered. Innovative new technology will help you protect your business and your customers by preventing fraud and streamlining services.

GET Mobile Verify, available across iOS, Android and Windows, provides users the ability to scan and verify mobile Driver's licenses from their windows operating system. This is ideal for businesses who want to have the ability to accept mDLs with an integrated solution, without the need for extra devices. Using the same familiar user-interface as the mobile apps eliminates almost all need for training, allowing businesses to start accepting mobile IDs the same day.

How do I GET it?

There are two ways to obtain GET Mobile Verify for Windows

- As a standalone application, downloaded from the Microsoft Store
- From GET as an integrated solution for business applications where you control the workflow

Both solutions offer the same functionality; the integrated solution offers users the ability to seamlessly accept mDL while using their current software, without needing to change screens, programs, or tabs.

GET Mobile Verify for Windows can scan QR codes and make online or offline Bluetooth transactions. NFC functionality will be coming soon though an extra piece of hardware will be needed. Verify for Windows can use a webcam, or any supported barcode scanner to read the presented mobile QR codes and decode them. These are the only required peripherals.

What do I need?

Minimum system requirements:

- Machine running Windows-Based OS (Windows 10 v1903 or newer)
- Webcam (Integrated or external)

Optional:

- BLE Dongle (TP Link UB400 or similar)
- 2D Barcode Scanner (See Microsoft Supported POS Peripherals)
- Barcode Scanners supported natively by Windows 10/11

*Windows is a registered trademark of Microsoft Corporation
